

OCCUPIED STATE
Manifesto
December 2025

They did not conquer us with tanks.
They conquered us with spreadsheets.

1,088,000 unaccompanied minors delivered since 2021.
312,000 known got-aways in FY2024 alone.
Millions more released on “parole” with court dates set a decade out.
Every one of them tracked, housed, and seeded into the interior by federal contractors paid per head.
The electric fence on the border now answers to the cartels, not the citizens.
Remote override logs prove it.

This is not immigration.
This is engineered demographic replacement executed under color of law.

The mechanism is simple and merciless:

1. Collapse the border.
2. Flood the zone with military-age males and future dependents.
3. Disappear them into a sponsor network run by NGOs that answer to no electorate.
4. Launder the numbers through redacted FOIAs and scrubbed databases.
5. Wait one generation.

The result is already visible in the birth-rate tables, the school rosters, the crime maps.
What took centuries of war and migration in the old world is being compressed into two decades by algorithm and policy.
The historic American nation—its people, its culture, its future—is being unmade in real time while cameras livestream the process and call it “humanitarian.”

We are not asking for permission to notice.
We are documenting the occupation in their own files.

Every leak on this site is raw, sourced, and verifiable.
We publish because silence is complicity.
We publish because the controlled media will never run the spreadsheets that prove the plan.
We publish because the only way to reclaim a country is to first prove, beyond denial, that it has been taken.

The hour is late, but the arithmetic is merciless.
Every day the border stays collapsed is another city’s worth of future voters imported.
Every day the sponsor lists stay secret is another neighborhood quietly erased.

There is no neutral position left.
You are either documenting the replacement or you are enabling it.

We choose exposure.
We choose reclamation.

If you possess evidence—spreadsheets, override logs, sponsor lists, vetting memos—send it.
Anonymity is absolute.
The occupation ends when the documentation becomes undeniable.

They took the country.
We are taking it back—one leak at a time.

Occupied State
